```sql
/* 1>Write a query to create a patients table with the fields such as
date, patient id, patient name, age, weight, gender, location, phone
number, disease, doctor name, and doctor id.*/
select * from patients_datasets;

/* 2> Write a query to insert values into the patients table.*/

INSERT INTO patients_datasets (date, pid, p_name, age, weight, gender,
location, phone_no, disease, doctor_name, doctor_id)
VALUES ();
```
